## **Wheeled Coach Launches TurboAir™**

### *Industry Leading Pure Air Filtration (P.A.F.) System Enhanced by TurboAir*

Orlando, Florida – Wheeled Coach Industries, Inc. – the largest Ambulance brand in the World – has launched TurboAir, an auxiliary air flow booster system that provides increased air velocity for patients and personnel in the patient compartment.

TurboAir provides an additional 900 CFM (through a ceiling ducted distribution system) when combined with the P.A.F. air conditioner's 3-speed, 900 CFM free flow rated blower.

“Created specifically to improve the comfort and protection of both patients and crews, TurboAir is yet another industry-leading feature for Wheeled Coach”, stated Scott Barnes, VP of Marketing and Sales.

Wheeled Coach's TurboAir system retains the industry-leading benefits of the P.A.F. System which protects personnel from exposure to airborne particles 0.3 microns (Anthrax, Meningitis, TB) or larger at an efficiency rate of 99.97%.

TurboAir is currently available when specifying a Wheeled Coach ambulance by contacting a Wheeled Coach sales representative.

Wheeled Coach is a wholly owned subsidiary of Collins Industries, Inc. In addition to being a leading manufacturer of ambulances (including medical attack vehicles, rescue vehicles and fire emergency vehicles), Collins Industries is North America's largest producer of Type “A” small school buses, the nation's second largest manufacturer of terminal trucks and a leader in the road construction and industrial sweeper markets. Since 1971, the Company has grown to approximately 1,000 employees in six plants comprising over one million combined square feet of manufacturing space. The Company sells its products throughout the United States and abroad.
