FROM THE WORLD'S LARGEST AMBULANCE BRAND

#### EMERGENCY "DIRECT RELEASE" TABS

#### DOOR RELEASES

## EXCLUSIVE EMERGENCY "DIRECT RELEASE" DOOR TABS

- HIGH-VISIBILITY SAFETY YELLOW
- AVAILABLE ONLY FROM WHEELED COACH

Introducing Wheeled Coach SafePASS™ – the exclusive exterior compartment and Patient Access Safety System. Designed specifically with your crew's safety in mind, this locking system provides improved ergonomics and protection. Exterior door handles have large, deep wells for a firm grip even with heavy gloves. The free-floating mechanism helps eliminate wear & tear normally caused by trying to open a locked door. And the emergency "direct release" tabs allow for doors to be opened in the event an accident has bent the door lock control rod. Other locking mechanisms can jam, making patient unloading and crew exit difficult and possibly dangerous. So don't chance it, go to [WheeledCoach.com](http://WheeledCoach.com) to contact your sales representative to learn more.
